QUALEVER PVC Frames for Doors & Windows are helping transform homes across India. QUALEVER is the leader in the habitat and construction markets. It designs, manufactures and distributes building materials, and provides innovative solutions to meet the growing demand in emerging economies for energy efficient and environmentally green building methods. QUALEVER is proud to introduce an innovative new alternative to traditional wooden door frames that is maintenance and rot free. The QUALEVER door frame system combines the strength and convenience of wooden door frames with the enhanced properties of 100% plastic composite, making them MOISTURE and TERMITE resistant.

➤ **Our Commitment - Customer Satisfaction**

QUALEVER PVC Frames are developed with German Technology and Highly reliable material PVC. QUALEVER PVC Frames are the best alternative to wooden frames. QUALEVER products provide you the best range of products to fulfill your dream for Safe, Secure and Beautiful home.

➤ **Advantages of PVC Frames for Door & Window**

Today, PVC products are the First choice of Builders / Architects - Worldwide. Its versatile performance makes it an alternative to Wood, uPVC, Steel or Aluminium door & window frames. We are the first in India to introduce PVC Frames for Door & Windows tailor made to India environment, culture, aesthetics & taste.

➤ **Durability of Plastic - Elegance of Wood**

QUALEVER PVC Frames has all the good properties of Wood with extra-ordinary durability of plastic. It gives traditional royal touch.

➤ **Termite(दीमक) Resistant**

QUALEVER PVC Frames are 100% termite resistant, that means they are extremely suitable for Indian subcontinent environment. 'No to pest control, no worries for TERMITE'.

➤ **Water (सीलन) Proof**

QUALEVER PVC frames are 100% water proof and easy to clean.

➤ **Flame Retardant**

QUALEVER PVC Frames are 100% flame retardant. So they ensure to control spread of fire during emergency.

➤ **Green Product**

QUALEVER PVC Frames are green product. No pest Control, No Chemical, Pollution Free, No Deforestation. safe for Children. "A Healthy Home".

➤ **Design**

QUALEVER PVC Frames have crisp, clear & soft profiles throughout the length. QUALEVER PVC Frames are in great demand in Metro cities.

➤ **Strength**

QUALEVER PVC Frames have been carefully designed to achieve maximum strength. They possess strong strength at every point of length.

➤ **Hardened Skin**

QUALEVER PVC Frames undergo a process to achieve hardened surface, which makes them dent & scratch resistant.

➤ **Thermal & Sound Insulation**

QUALEVER PVC Frames at right angles corners are securely achieved with simple technique of internal locking. Minimum skill and tools are required to manufacture the whole frame. So, they are really carpenters friendly. For heavy doors plastic Insert for screws should be used. All wood working possible.

➤ **Self Extinguish**

QUALEVER PVC Frames are self extinguishing within two second after removal of flame source.

➤ **Wind Load Suitability**

QUALEVER PVC Frames are very suitable for high rise building, they can with stand even 3000 pascals of wind speed (equivalent to 250 km/hr of wind velocity).
